

Defend Gensokyo in Touhou TRPG Fantasy Maiden Wars, Launching Today on PC

TOKYO — Oct. 20, 2025 — [Fantasy Maiden Wars - DREAM OF THE STRAY DREAMER](#) -, the bullet hell tactical RPG based in the Touhou universe developed by [Sanbondo](#) and published by [Phoenixx Inc.](#), sends heroines to the front lines to save Gensokyo today on [PC via Steam](#) for the first time outside Japan.

Strange incidents across the land incite chaos among the humans, yokai, and gods that all call Gensokyo home. Commandeer a team of Touhou heroines to get to the bottom of the trouble and bring peace back to their realm.

Choose either Shrine Maiden Reimu or Marisa the Magician as the protagonist to explore a branching narrative that spans 77 chapters, blending elements of official Touhou Project lore and lore from fan-made creations. Bolster the ranks with 70+ other playable Touhou heroines, each with unique abilities and battle animations.

Build an elite strike squad of optimized units, or level up a select set of heroines for a party of favorites. Deploy the team on grid-based battlefields, arranging them in formations to take advantage of terrain and dodging bullet hell-inspired area-of-effect attacks. Turn the tide of battle with powerful, damage-dealing Spell Card attacks from up close and afar.

Need a break from the front lines? Take a break in the library and peruse the in-game Glossary, flush with reference material on official and fan-made Touhou Project lore. March to the beat of your own drum in the Music Room, featuring over 200 Touhou tracks to play during leisure time.

“We’re so excited to bring this tale of epic proportions to Touhou Project fans around the world,” said Sanbon, Team Reader at Sanbondo. “*Fantasy Maiden Wars* was created with such a deep love and respect for Touhou Project lore, both official and fan-made, and we can’t wait to show everyone the final result.
