● Watch Battles in Real-Time: "Spectator Mode"

A spectating feature has been added to Private Matches. By joining a matched room as a third participant, you can watch the heated battle between two players in real-time.

Two viewing perspectives are available:

- **Split-Screen View (Steam/Switch):** Watch both players' movements simultaneously on a divided screen.
- **Bird's-Eye View (Steam only):** Overlook the entire field from above to grasp the full tactical situation.

Players can take turns battling and spectating in groups of three, or share their screens via Discord to enjoy the excitement with even more people!

● Sharpen Your Skills: "AI Battles"

We have added an "AI Battle" mode where you can practice alone against an AI opponent. This is perfect for training under the same tension as a real match. Step up your game at your own pace!
